BOARD SETUP

SCHOOL PROBLEMS

We have decided on a new way to get the best out of your MOON Board and set of School Holds which will hopefully make life a bit easier all round. Rather than setting one problem at a time, this method puts the full set of holds all on the board at the same time in a random position. Then we have set 6 problems on this grid from 6c up to about 8a which can all be climbed without moving a hold. For these problems you only need the grid ref below. Not rocket science but just a more traditional way of setting problems. More sheets will follow in this manner. Let us know how you get on and send us some problems if you spot any alternatives you consider worth a bash.

Enjoy! MOONCLIMBING.COM
